

## Transport system for PneuLift®

**NEW**

Art. No.	Product
726000	PneuMobil 0.35

The PneuMobil enables easy and time-saving transport of vehicles between work areas. It is excellently maneuverable and can also be used in confined areas due to its maneuverability. Electric cars that are switched off can be moved without any problems, as can vehicles that are not ready to drive in the workshop.

### Equipment:

- Powerful electric drive
- Control via convenient, pendant radio remote control
- Lifting capacity + 3.5 tons vehicle weight
- Drives on smooth floors and gratings (e.g. in paint booths)
- Flashing lights front and rear for safety while driving
- Sensitively controllable, linear steering
- Two speed levels (0 - 3 km/h; 0 - 6 km/h), steplessly controllable
- Centering bars for easy mounting of the lifting platform
- Horn integrated in the remote control
- Easy access to the batteries via service cover
- Easy refilling of the batteries with distilled water via central connection

## suitable for:

Art. No.	Product
700880	PneuLift® 0.35 F BA
701060	PneuLift® 0.35 FK BA

Existing PneuLift® platforms of the above-mentioned series can partly be used with the PneuMobil after conversion. Please contact us.
