

Corporate Policy

The primary objective of Consul Werkstattausrüstung GmbH in Halver is to provide its customers exclusively with high-quality products and services. Achieving and maintaining this standard forms the essential basis for the company's long-term success.

Customer satisfaction results from compliance with prescribed requirements and agreed arrangements concerning the safety, quality and characteristics of our products. For us, manufacturing vehicle lifts in line with market needs means placing our customers' requirements at the centre of everything we do.

We are committed to complying with all applicable legal requirements and other necessary provisions in accordance with our register of legal and permit requirements, as well as with our compliance obligations, data protection obligations and social responsibility.

Within our internal processes, adherence to defined rules helps minimise errors and duplicated work. This is to be achieved not through increased monitoring, but through the motivation and commitment of our employees.

The safety and health of our employees and of the users of our products, together with the prevention of environmental impacts, the improvement of energy-related performance and our firm commitment to Germany and to Halver as our business location, are key obligations for our company. We fulfil these obligations through the continual improvement of our integrated management system, the active involvement of our employees and systematic personnel development.

Through operating instructions and defined procedures, the integrated management system ensures that hazards, risks and opportunities, as well as deviations from requirements, are identified, analysed and used for the benefit of all.

By implementing the system described above, we focus on the following key areas:

- Maintaining and creating safe workplaces and healthy working environments
- Active and preventive environmental and climate protection
- Energy-efficient use of machinery
- Strengthening our competitiveness
- Access to new fields of application and markets
- Procurement of safe, environmentally responsible and energy-conscious products and services
- Commercial success

The Integrated Management System receives the full support and commitment of the Management. The necessary information and resources are provided as required.

Halver, July 2026

Frank von der Crone (Managing Director)
